

Dear Parent/ Guardian

[date]

We take your childrens' futures seriously, enhancing their skills beyond the purely academic is a requirement for the 21stC workplace. Equipping them with independent learning skills, encouraging them to take responsibility for their actions, by first helping them understand the consequences of their decision-making, all while developing an understanding that they are part of a global community.

Therefore, we have signed up to the ITZA School Challenge as a solution to helping your children learn more broadly.

From [date of challenge], students can access an abundance of online resources to explore independently and learn more about climate change and sustainability.

Using this knowledge, students will then take part in a series of quizzes, competing against schools all over the world.

The Challenge requires students to register [on the Challenge webpage](#) from [date of challenge].

Step 1: Students create a login on the Challenge webpage by picking a username and creating a password. If your child is aged 13 or under, they must give an email address for a parent or guardian in order to approve their account.

Step 2: Students login and enter school code: [give your school code] There is one code per school and no upper limit on the number of students who can use it.

What Your Children Will Do in the Challenge

- Go head-to-head with schools across the globe
- Explore new content independently
- Take part in fun quizzes to test knowledge
- Climb the leaderboard!

If you have any questions please do not hesitate to contact the ITZA team at inspire@itza.io.

Yours sincerely
